Just diagnosed? Undergoing treatment?

Our support group is for people with brain tumors and those who love them. Led by Mount Sinai's social workers, nurses, and neurosurgeons, the Brain Tumor Support Group gives you and your loved ones an open session to learn from others' experiences, share your own, exchange ideas, and seek support.

Mount Sinai offers state-of-the-art, comprehensive treatment of all types of brain tumors. We take an interdisciplinary approach, working with team members from the departments of neurosurgery, neurology, radiation oncology, and rehabilitation medicine to ensure the highest quality care. We strive to improve quality of life, extend survival rate, and provide support.
